I. SELECTUM BELGIUM FUND

I. Investment Objective, Policy and Specific Risk factors of Selectum Belgium Fund (“the Sub-Fund”)

1. Investment Objective

The Sub-Fund’s objective is to offer its shareholders a maximum increase of value in the medium term, i.e. with a 5-7 year horizon. In normal circumstances the Sub-Fund will not distribute dividends, but will accumulate profits.

The Sub-Fund intends to achieve its objective mainly by the active management of a portfolio of eligible financial assets. In accordance with the conditions and limits set out in Part A of the Prospectus, and in compliance with its investment policy as defined below, the eligible financial assets may consist of transferable securities, money market instruments, units of UCITS and/or UCIs, bank deposits and/or financial derivative instruments.

The Sub-Fund will adopt a bottom up research intensive investment approach, targeting those companies who have superior cash flow and return on investment characteristics. Proper evaluation of each security invested in is vital to ensure good long term performance. The Investment Manager of the Sub- Fund uses quantitative methods to identify potential investment opportunities and then engages in a vigorous process of analysis, background checking and interviews of the senior management of target companies before investing in the securities of these companies. Once an investment is made, the managers will hold ongoing meetings with senior management as well as use independent research to ensure the investment thesis is correct. The Sub-Fund will make no attempt to replicate some benchmark index and it is noted that performance of the Sub-Fund may vary significantly from indices from time to time.

There is however no guarantee that this objective will be achieved.

2. Investment Policy

The Sub-Fund will mainly invest in a diversified portfolio of equity and/or equity-related securities issued by companies listed on the official stock market in Belgium.

SELECTUM STOCK PICKING FUND

It is understood that these equity and equity-related securities will qualify as transferable securities within the meaning (i) of the Article 41(1) of the Law of 2010, and (ii) of the Article 2 of the *Règlement grand-ducal* of 8 February 2008.

The Sub-fund may also invest in other UCITS and UCIs subject to the restrictions set forth under Part A of the Prospectus where the Investment Manager believes that investment in such schemes will enhance overall performance. However, the Sub-Fund will not invest more than 10% in units of UCITS or other UCIs. It should be noted that the investment in units of other UCITS and UCIs may entail a duplication of certain fees and expenses.

If the Sub-Fund invests in units of UCITS or UCIs managed by the Promoter's group or the Investment Manager, no subscription or redemption fee will be charged for investments by the Sub-Fund into other investment funds of the Promoter's group or the Investment Manager.

The remainder of the assets may be invested in any transferable securities, money market instruments or cash.

The Sub-Fund may also use financial derivative instruments for hedging and efficient portfolio management purposes. This use will be made in a manner not to materially alter the Sub-Fund's risk profile over what would be the case if financial derivative instruments were not used

The Sub-Fund will calculate its global exposure resulting from the use of financial derivative instruments on a commitment basis. On the basis of this approach, the positions on financial derivative instruments must be converted into equivalent positions on the underlying assets. The global exposure relating to financial derivative instruments is calculated taking into account the current value of the underlying assets, counterparty risk, foreseeable market movements and the time available to liquidate the positions. The Fund shall ensure that the global exposure of the Sub-Fund relating to financial derivative instruments does not exceed the total net assets of that Sub-Fund. The Sub-Fund's global exposure shall consequently not exceed 200% of its total net assets. In addition, this global exposure may not be increased by more than 10% by means of temporary borrowing, so that the Sub-Fund's overall risk exposure may not exceed 210% of its total net assets in any circumstances.

Notwithstanding the above provisions and if justified by exceptional market conditions and/or if the Investment Manager expects incoming bear markets, the Sub-Fund may invest up to 100% of its net assets in cash and cash equivalents, term deposits, debt securities and money market instruments dealt in on a Regulated Market and whose maturity does not exceed 12 months, monetary UCITS and UCIs. In general terms, the Sub-Fund will comply with the investment restrictions and the principle of risk spreading set forth under Part A of the Prospectus. There is no restriction so as to the currency of these securities. Term deposits and liquid assets may not exceed 49% of the Sub-Fund's net assets; term deposits and liquid assets held by any counterparty including the Custodian may not exceed 20% of the Sub-Fund's net assets.

3. Investment Restrictions

The Sub-Fund is subject to the investment restrictions set out in Part A of the Prospectus under chapter I, section B and C. In addition, the Sub-Fund may use techniques and instruments as set out under chapter I, section D in Part A of the Prospectus.

SELECTUM STOCK PICKING FUND

The Sub-Fund shall not invest more than 10% of its assets in units of UCITS or other UCIs.

The investment restrictions may not be complied with during a transitional period of 6 months from the date on which the Sub-Fund has been authorized, provided that the Sub-Fund will endeavour to ensure, at all times, an appropriate level of diversification of risk within the portfolio of the Sub-Fund.

4. Risk Profile

No guarantee can be given that the Sub-Fund's objective will be achieved and that investors will recover the amount of their initial investment.

a) Equity Risks

The equity markets may fluctuate significantly with prices rising and falling sharply, and this will have a direct impact on the Sub-Fund's Net Asset Value. This means that when the equity markets are extremely volatile the Sub-Fund's Net Asset Value may fluctuate substantially.

b) Interest rate risk

The value of investments in bonds and other debt securities may rise or fall sharply as interest rates fluctuate. As a general rule, the value of fixed-rate instruments will increase when interest rates fall, and fall when interest rates increase.

c) Credit risk

This risk is linked to the issuer's ability to settle its debts. If the rating of an issue or issuer is downgraded this may cause the value of the related debt securities in which the Sub-Fund has invested to fall.

The severity of the risk varies depending on the quality of the securities in the portfolio and whether they are "Investment Grade" (good quality) or "Below Investment Grade" (inferior quality).

d) Liquidity risk

When market conditions are unusual or a market is particularly thin the Sub-Fund may encounter difficulties in valuing and/or selling some of its assets, in particular to satisfy large-scale redemption requests.

e) Currency risk

The Sub-Fund holds assets denominated in currencies other than its reference currency. It may be affected by changes in exchange rates between the reference currency and these other currencies or by changes to exchange control regulations. If the currency in which an asset is denominated appreciates against the sub-fund's reference currency, the security's equivalent value in the reference currency will also appreciate. Conversely, a depreciation in the currency will result in a fall in the security's equivalent value in the reference currency.

SELECTUM STOCK PICKING FUND

f) Counterparty credit risk

The Sub-Fund may have credit exposure to counterparties by virtue of financial or derivative contracts held by the Sub-Fund. The Sub-Fund may also be exposed to a credit risk on parties with whom it trades securities, and may also bear the risk of settlement default, in particular in relation to debt securities such as bonds, notes and similar debt obligations or instruments. When a Sub-Fund invests in a security or other instrument which is guaranteed by a bank or other type of financial institution there can be no assurance that such guarantor will not itself be subject to credit difficulties, which may lead to the downgrading of such securities or instruments, or to the loss of some or all of the sums invested in such securities or instruments, or payments due on such securities or instruments. Notwithstanding any measures implemented by the Sub-Fund to reduce the aforementioned risks, there can be no assurance that counterparties will not default or that the Sub-Fund will not sustain losses on the transactions as a result.
